EDUCATION

Shri Shankaracharya Institute of Professional Management and Technology

2021 – 2025

B.Tech – Computer Science and Engineering – CGPA: 7.5

Raipur, Chhattisgarh

Glorious Higher Secondary School

2020 – 2021

Class XII – CGPA: 9.3

Raipur, Chhattisgarh

TECHNICAL SKILLS

Languages: C, C++, Python, JavaScript, SQL

Frameworks Technologies: React.js, Node.js, Express.js, MongoDB, NumPy, Pandas, Matplotlib, Scikit-Learn

Cloud DevOps: Google Cloud Platform (GCP), REST APIs, Microservices Architecture

Developer Tools: VS Code, Github, Google Cloud Platform (GCP), Postman

Core CS: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems

EXPERIENCE

Dutta Integrated Services

Aug 2025 – Feb 2026

Software Developer Intern

- Developed an analytics feature to monitor customer behavior and identify order summary, enabling data-driven retention strategies that improved customer retention by 20%.
- Engineered an SMTP notification service for an insurance claim management module within a hospital HMS, applying transaction management principles to reduce manual reconciliation overhead by 25% and ensure reliable real-time claim communication.

PROJECTS

SkillScan AI - Resume Analyzer 🔗 | Reactjs, Nodejs, Expressjs, MongoDB, Gemini API

- Engineered an AI-powered resume analysis platform that compares candidate resumes against target job descriptions to generate personalized skill gap analyses and role alignment metrics, enabling data-driven application optimization for job seekers.
- Implemented secure authentication mechanisms including Google OAuth and email-based login with per-user rate limiting, while designing scalable Node.js APIs that balance controlled access with data confidentiality and consistent system performance.

DeepScout – Autonomous Multi-Agent Research System 🔗 | React, FastAPI, LangChain, Gemini API

- Built an automated AI research pipeline using LangChain and Google gemini-2.5-flash to automate information retrieval, analysis, and comprehensive research report generation.
- Integrated Tavily API and BeautifulSoup to search, identify, and scrape relevant web pages, providing contextual information for accurate report generation.
- Developed an LLM-based evaluation pipeline that reviewed generated reports, assigned quality scores, highlighted strengths, and suggested improvements.

AlgoForge – AI-Powered DSA Revision Platform 🔗 | MERN, Google Gemini API

- Designed and developed an AI-driven code analysis platform using a RESTful API architecture to integrate Gemini API with the MERN stack, delivering personalized DSA revision workflows.
- Implemented automated code evaluation supporting error detection, time and space complexity analysis, and optimization suggestions via function-calling integration with Google Gemini API.

ACHIEVEMENTS & CERTIFICATIONS

- Completed industry-led full-stack MERN development curriculum and immediately applied those competencies in a 6-month production internship, delivering shipped features across live products.
- Completed Data Structures and Algorithms (DSA) certification from Apna College, applying structured algorithm design and optimization techniques.
- Solved 400+ DSA problems on LeetCode and GeeksforGeeks, maintaining consistent emphasis on time complexity optimization.
