EDUCATION

Shri Shankaracharya Institute of Professional Management and Technology

2021 – 2025

B.Tech - Computer Science and Engineering - CGPA: 7.5

Raipur, Chhattisgarh

Glorious Higher Secondary School

2020 – 2021

Class XII - CGPA: 9.3

Raipur, Chhattisgarh

TECHNICAL SKILLS

Languages: C, C++, Python, JavaScript, SQL

Frameworks & Technologies: React.js, Node.js, Express.js, MongoDB, NumPy, Pandas, Matplotlib, Scikit-Learn, OpenCV

Developer Tools: VS Code, MongoDB Compass, GitHub, Postman

EXPERIENCE

Dutta Integrated Services

Aug 2024 – Present

Software Developer Intern

- Architected and deployed a secure role-based web application for an experimental equipment client, implementing granular access controls (RBAC) that restricted employee data access by assignment while automating complex business workflows and quotation lifecycles.
- Engineered a month-wise order tracking and analytics platform using the MERN stack that analyzed behavioral patterns to identify inactive customers and segment users by churn risk, enabling targeted retention campaigns that increased customer retention by 10%.

PROJECTS

AlgoForge AI – AI-Powered DSA Revision Platform 🚀 | MERN, Google Gemini

- Architected an intelligent DSA revision platform integrating Gemini AI with the MERN stack to deliver personalized optimization feedback and structured revision schedules, bridging the gap between problem-solving practice and algorithmic efficiency.
- Developed a comprehensive code analysis engine featuring automated error detection/correction, time/space complexity evaluation, version-to-version optimization comparisons, and interactive DFD visualization—directly improving user retention and analytical proficiency.

SkillScan AI – Intelligent Resume Analyzer 🚀 | React, Express, Node.js, MongoDB, Gemini AI

- Engineered an AI-powered resume analysis platform that compares candidate resumes against target job descriptions to generate personalized skill gap analyses and role alignment metrics, enabling data-driven application optimization for job seekers.
- Implemented secure authentication mechanisms including Google OAuth and email-based login with per-user rate limiting, while designing scalable Node.js APIs that balance controlled access with data confidentiality and consistent system performance.

LinkZipp – URL Shortener 🚀 | React, Express, Node.js, MongoDB

- Developed a full-stack URL shortening service that transforms lengthy URLs into concise, shareable links with guaranteed redirection integrity, simplifying link sharing through an intuitive interface.
- Built robust backend services using Node.js and Express to handle CRUD operations for URL management, implementing optimized MongoDB schemas and low-latency redirection logic for seamless user experiences.

ACHIEVEMENTS

- Qualified for college-level submission in Smart India Hackathon 2024.
- Secured AIR 343 in GeeksforGeeks Weekly Coding Contest, demonstrating strong problem-solving abilities.
- Earned Web Development Certification from Udemy, covering modern frontend and backend technologies.
